the power of PACKAGING
Harnessing the Power of Packaging to Improve the Quality of Life

San Miguel Yamamura Packaging Corporation (SMYPC) banks on the combined competencies of two recognized Asian brands – Southeast Asia’s food, beverage and packaging giant San Miguel Corporation and Japan’s Nihon Yamamura Glass Company, Ltd.

Consolidating Filipino ingenuity and Japanese proficiency, SMYPC provides total packaging solutions in locations throughout the Philippines and across the globe.

Quality, integrity and established expertise, coupled with sensitivity to our products’ impact on the environment – these are the trademarks of our products and services, enabling us to adapt and be flexible to changing market trends and the needs of our customers.

Our products and services encompass the total packaging process, plus solutions for better efficiency and compliance to regulatory requirements.

We offer packaging requirements of a wide variety of industries, research and testing, design, PET recycling, contract filling, trading, as well as material resource planning and consultancy services on distribution, manufacturing and environmental concerns such as waste management and environment management systems.

We imbue each and every part of our total packaging solutions with consistency in quality. Keeping the improvement of the quality of life always in mind, we also support activities and initiatives for education and livelihood in key communities.
San Miguel Yamamura Packaging Corporation (SMYPC) is a joint venture between San Miguel Corporation (SMC), Southeast Asia’s largest food and beverage and packaging company based in the Philippines and Nihon Yamamura Glass Company, Ltd. (NYG) of Japan.

With approximately 4,000 employees within the Philippines and Southeast Asia; 16 domestic and 10 international facilities, the company has grown steadily from pioneer to market leader. Today, it is a global player and a recognized total packaging solutions provider.

SMYPC is a team of experienced industry professionals who not only have the company’s future in mind but the welfare of its customers, partners and other various stakeholders.

Harnessing the Power of Packaging to Improve the Quality of Life
Premium, efficient and unique glass containers are a popular choice as an attractive and image-enhancing solution for displaying, preserving, handling and transporting products.

- We are one of Southeast Asia’s glass producers with the most modern glass manufacturing facilities.

- Our highly precise, high-quality glass mold production with robotics technology and CAD/CAM System will allow you to view and enhance bottle designs on the spot.

- We are backed by cutting-edge technologies of Nihon Yamamura Glass Company, Ltd. and Fuso Machine and Mold Manufacturing Co., Ltd.

- We offer Applied Color Label (ACL)-decorated bottles, novelty bottles, bottles, custom-designed bottles and jars and stock glass bottles in amber, green, blue and tint for:

  - Beer
  - Softdrinks
  - Spirits and Liquors
  - Pharmaceuticals
  - Food
  - Personal Care
  - Chemicals

Plastics

With high aesthetic value and marketing appeal, lasting characteristics, hygienic quality and convenient features, plastic crates, pallets and one-way containers are more economical and are becoming the future’s packaging choices.

- Best for handling and storage requirements of beverage, food, poultry and fish, fresh produce and industrial applications.

- We assure uniform size, weight, performance and smooth fabrication for your work safety and load protection.

- For faster and efficient product handling, we offer a convenient four-way entry pallet feature.

**Plastic Crates**
- Bottle Crates (Glass/PET)
- Multi-Purpose Crates
- CD Crates

**One-Way Containers**
- Paint Bucket
- Margarine Tubs and Lids
- Plastic Tubes
- Multilayer
- Monolayer

**Pallets**
- Heavy-Duty Load
  - 8-Piece Welded Pallets
  - Beverage Pallets
  - Beer Pallets
  - Twin Pallets
  - Medium to Heavy Load
  - 2-Piece Welded Pallets
  - Light Load
  - Slim Pallet
  - Pallet Lite

- Food Trays
- TUFFMat (Pigpen Flooring)
- E-MAT (Chicken Flooring)
Proving to be the lightest and convenient beverage containers, the aluminum can is the top choice for keeping drinks cold and fresh. Metal closures, on the other hand, seal in contents and prevent spillage. Metal closures include:

- Crowns
- Continuous Thread Caps
- Vacuum Twist Off Caps
- Vented Caps
- Pilfer Proof Caps

Convenient and easy to carry, flexibles are made of easily yielding materials such as film, foil or paper sheeting which when filled and sealed, acquire pliable shapes and when printed make attractive merchandizing tools. Flexibles include:

- 2-Piece Aluminum Can
- Body
- Ends
- Magical Can (Thermochromic and Glow in the Dark)
- Retortable Aluminum Can
- Ziplock
- ESD Bags
- Curviché

Our state-of-the-art equipment and technology, including econocolor and E-Cut, generate quality printing and lamination that capture customer specifications. We are equipped with a Design Centre where graphic artists design and offer development assistance and employ the most advanced pre-press technology from Japan and Hong Kong.

We serve a variety of industries in Hong Kong, Canada, Australia, Pakistan, Indonesia, Papua New Guinea, the Fiji Islands, Nepal, Myanmar and the Philippines.
PET (Polyethylene Terephthalate) is safe, convenient, versatile, lightweight, cost-effective and recyclable; the packaging ideal for carbonated soda, water, beer and hot fill products like juice.

- Our state-of-the-art beverage toll-manufacturing facilities are capable of cold and hot-fill products such as carbonated softdrinks, water, juices and teas. Processes include PET preform and bottle production, beverage preparation, filling, capping, labeling and case packing.
- Our preforms and caps come in various sizes and colors:
  - PET Preforms
  - PET Bottles
  - PET Flakes
  - Recycled (rPET)
  - Filled PET Bottle Products
  - Plastic Closures

A well-designed and precise mold is one of the keys to successful packaging.

- We have a wide range of welding capabilities including Plasma Transfer Arc (PTA), Thermal Spray Arc and Gas Welding which are handled by the finest skilled welders.
- We utilize sophisticated Computerized Numerically Controlled (CNC) machines from Japan that were designed for high speed precision machining and capable of handling any complex design with greater accuracy and reliability.
- We have the design, capability and expertise to produce 2D drafting, 3D surfacing, solid surface modeling and thermal analysis of any engineering projects.

PET Recycling

The first recycling facility in Asia with the capability of recycling post consumer PET bottles back to food grade bottles.
Corrugated cartons, perfectly crafted, are reliable shipping, warehousing, and marketing tools.

- Our computerized total Optimization Packaging System provides box structure design with optimum transportability, stackability and usability.
- We offer halftone, multi-color printing and graphic design to give you endless possibilities for creative and functional designs.
- We provide corrugated cartons for industrial applications and the beverage, food, pharmaceutical, cigarette, chemical, hardware, electronics and personal care industries.

These are available in the following types:

- Flute B and C Cartons
- Single and Double Wall Boards
- White-Coated Boards
- Boards with Water Repellent Coating
- Wrap-Around Cartons, RSC, CSSC, Carton Trays
- HardBOX - Reinforced Cartons
- E-Flute Cartons
- K-Flute Cartons
- Mill Run Sheets
- Partitions and Pads
- Corrugated One-Way Pallets
- Cartondola and Other Point-of-Purchase Displays

Packaging is no longer just about bottles, boxes, pouches or mere product containers. It has evolved to dictate a product's branding and positioning. In our effort to continuously adapt to this evolution, we take pride in providing you a diverse portfolio of packaging products and services that are integrated with new ideas and new technologies.

**ENVIRO-TUFF** (Radiant Barrier)
- Multiple layer laminates with high reflective quality used in the construction industry as reflection or heat barrier in industrial, commercial and residential buildings.

**PRIMERA** (Medical Protector)
- Breathable protector which acts as the primary shield to germs and bacteria and is greatly applicable in the world of medicine and surgery.
  - Caps
  - Gowns
  - Masks
  - Shoe Covers
  - Surgical Drape
  - Waterproof Bedding

**WOVEN PRODUCTS**
- High quality polypropylene and polyethylene woven sacks and fabrics suitable for building and construction, packaging and telecommunication industries. These are used for packaging fertilizers, animal feeds, sugar, oleochemicals, cement and other agricultural, textile, chemical and metal products.
  - PP/PE Woven Sacks and Fabric
  - Insulation Materials
  - PP/Paper Composite Sacks
  - Barrier Kraft
  - PE/Paper Composite Sacks

**BOPP, CPP AND METALIZED FILMS**
- High quality flexible packaging produced by state of the art technology for various industries like food and personal care.
GREEN FILM
- Biodegradable, environment-friendly packaging which can be applied as flexible packaging, adhesive tape, sticker and label, paper lamination and outer wrap for tobacco, bread, straw and flower wrap.

PLASTIC CLOSURES
- We offer a wide variety of plastic closures to suit different packaging needs for food, beauty, chemical, healthcare and household products.

CARTON DIVIDERS or COSLOCK WINE DIVIDERS
- Are made from assembled solid cartonboard components and are suited to stand up bottle cartons.

CORK CLOSURES
- Cork Solution for Sparkling Wine
- Cork Solution for Still Wine
- Cork Stopper Solution

RIGID PLASTIC CONTAINERS
- We have a broad line of stock plastic containers ranging in size from 20mL to 25L:

  Bottles
  - Barrel Shaped
  - Beverage
  - Pharma Boston Round
  - Dairy and Food
  - Flask and Square
  - Squat
  - Round
  - Tall Cylinder

  Tablet Bottles
  - Pharmavial
  - Rectangular
  - Round

  Jars and Vials
  - Styrene
  - Clear Plastic
  - Cosmetic Style
  - Polypro Open Top
  - Round Polyethylene

  Drums
  - Open Top

  Spoons and Measures

  Cubes and Large Jerricans
  (suited for chemicals, poison and D.G.A. up to 10 liters)

San Miguel Yamamura Packaging Corporation is committed to the protection, preservation and enhancement of the environment.

The company’s Environment Management System focuses on continual improvement — a key philosophy which reflects how SMYPC utilizes its resources; and manufactures, packages, distributes and markets its wide range of products.

Consistent with its mission of responsible stewardship of the environment, SMYPC adopts a holistic approach by:

- Exercising leadership in providing environmentally acceptable manufacturing processes, products and packaging;
- Actively developing and implementing processes which involve the sustainable use of resources, pollution prevention and waste management;
- Consistently meeting environmental standards; and
- Influencing its key stakeholders through the sharing of the company’s environment policy.

San Miguel Yamamura Packaging Corporation believes that as the environment thrives, business thrives.
